# HARSH SINGH

**FULL-STACK DEVELOPER | B.TECH CSE, 2027**

9910705140 | harsh123singj@gmail.com | LinkedIn | GitHub | LeetCode

## PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer building end-to-end web products with React, Node.js, Express, PostgreSQL and Prisma. Hands-on experience with REST APIs, authentication, AI-enabled document workflows, Kafka event processing, RBAC and real-time updates. Strong foundation in Java, data structures and algorithms, and core computer science.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, SQL

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, React Router, Context API

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, Role-Based Access Control

**Data & Messaging:** PostgreSQL, MongoDB, Prisma ORM, Redis

**AI & Tools:** LLM API Integration, Git, GitHub, Postman, Docker, Docker Compose

**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## PROJECTS

**1. TicketsInSeconds — High-Concurrency Event Ticket Booking System | Live Demo | GitHub**

**Stack:** React.js, Node.js, Express.js, PostgreSQL, Prisma, Redis, Kafka/KafkaJS, Docker

- Built event discovery, authentication, seat selection and booking workflows with PostgreSQL-backed persistence.
- Designed Redis TTL-based seat locking to temporarily reserve seats and help prevent conflicting concurrent bookings.
- Integrated Kafka event publishing for asynchronous booking workflows; configured Docker Compose and cloud servicesincluding Neon PostgreSQL, Upstash Redis and Aiven Kafka.

**2. DocTalk AI — AI-Powered Document Analyzer | Live Demo | GitHub**

**Stack:** React.js, Node.js, Express.js, JavaScript, PDF Processing, LLM APIs

- Developed a document workspace for PDF upload, viewing, summarization and AI-assisted question answering.
- Implemented document-aware conversations with source citations to connect generated answers to relevant uploadedcontent.
- Connected frontend and backend document-processing and AI interaction flows in a responsive SaaS-style interface.

**3. Smart Vehicle Platform — Role-Based Vehicle Operations System | Live Demo | GitHub**

**Stack:** React.js, Node.js, Express.js, PostgreSQL, Prisma, Socket.IO

- Implemented role-based access control (RBAC), alerts and real-time client/server communication using Socket.IO.
- Built backend workflows and APIs for journeys, verification, queues, bay assignment and service sessions.
- Modeled operational entities and relationships with Prisma and PostgreSQL to support structured vehicle-service workflows.

## EDUCATION

**Echelon Institute of Technology, Faridabad** — B.Tech in Computer Science and Engineering | 2023–2027 (Expected)

## INTERESTS

Enjoy playing sports and video games, which keep me competitive, focused, and comfortable working toward shared goals. I also enjoy singing as a creative outlet and a way to recharge outside technical work.
