HARSH SINGH

FULL-STACK DEVELOPER | B.TECH COMPUTER SCIENCE, 2027

9910705140 | harsh123singj@gmail.com | Faridabad, India | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer (2027) experienced in building responsive web applications and backend services using React.js, Node.js, Express.js, PostgreSQL and Prisma. Skilled in REST API development, JWT authentication, database design, AI-enabled document workflows, Redis-based seat locking, Kafka event-driven processing and real-time communication with Socket.IO. Focused on building reliable, scalable applications with clean user experiences.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, React Router, Context API

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, Role-Based Access Control

Databases & Messaging: PostgreSQL, MongoDB, Prisma ORM, Redis, Apache Kafka, KafkaJS

Developer Tools & Cloud: Git, GitHub, Postman, VS Code, Docker, Docker Compose, Render, Neon, Upstash

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

TicketsInSeconds — High-Concurrency Event Ticket Booking Platform | React.js, Node.js, Express.js, PostgreSQL, Prisma, Redis, Kafka, Docker

Links: Live Demo | GitHub Repository

- Developed event discovery, user authentication, seat selection and booking workflows with PostgreSQL-backed persistence and structured Prisma data models.
- Designed Redis TTL-based seat locking to temporarily reserve seats and reduce conflicting bookings under concurrent user activity.
- Integrated Kafka/KafkaJS event publishing for asynchronous booking workflows; configured Docker Compose and cloud infrastructure using Neon PostgreSQL, Upstash Redis and Aiven Kafka.

DocTalk AI — AI-Powered Document Analyzer | React.js, Node.js, Express.js, MongoDB, PDF Processing, LLM APIs

Links: Live Demo | GitHub Repository

- Built a document workspace supporting PDF upload, text extraction, document viewing, summarization and AI-assisted question answering.
- Implemented document-aware conversations and source-aware responses to help users connect AI-generated answers with uploaded document content.
- Integrated JWT-authenticated backend APIs and workspace-level access checks, connecting document processing and AI interaction flows in a responsive SaaS interface.

Smart Vehicle Platform | Node.js, Express.js, PostgreSQL, Prisma ORM, Socket.IO, RBAC

Links: Live Demo | GitHub Repository

- Implemented role-based access control (RBAC) and alert management to support permission-aware workflows and operational notifications.
- Built real-time communication using Socket.IO, including server initialization and reusable socket access for live client updates.
- Developed backend APIs for journeys, verification, queue management, bay assignment and service sessions, supported by a Prisma-based data model.

EDUCATION

Echelon Institute of Technology, Faridabad | B.Tech in Computer Science and Engineering | 2023–2027 (Expected)

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

INTERESTS

Sports and fitness, strategic video games, singing, and exploring emerging technologies and software products.
